

Antron® Brilliance™ nylon | Product Sheet

Color that performs – brilliantly

It is said we dream in black and white, but we disagree. With the dramatically vivid color of Antron® Brilliance™ nylon, virtually any look is achievable. . . so dream on.

Antron® Brilliance™ nylon – a technological breakthrough with its patented fiber engineering – fulfills the need for richer, more balanced color, and gives you more styling options than ever before. This latest fiber innovation, with a specially engineered shape, delivers brighter, more vibrant color without sacrificing the proven soil hiding capabilities of hollow filament technology. It's a peerless combination of style and practicality that makes Antron® Brilliance™ nylon the ideal choice when you need it all – performance, style and sustainability.

Offering the ultimate in flexibility, you can even combine Antron® Brilliance™ nylon with other Antron® fibers and Antron® FiberEffects™ nylons (a special collection of Antron® carpet fibers inspired by natural materials like metal, silk and wool), to create your own unique designs. With Antron® Brilliance™ nylon, the possibilities are virtually endless.

Get your kicks with Type 6,6

Did you know that not all nylon carpet fibers are the same?

Antron® Brilliance™ nylon has all the benefits of Type 6,6 nylon, a specially engineered polymer for outstanding carpet performance. Among other advantages, the tighter structure of Type 6,6 means it's tougher for stains to penetrate the carpet – so a spill takes longer to become a stain, allowing more time for the spill to be cleaned.

Whether your key concerns are staining, crushing, matting, abrasive wear – or all of the above – the tighter structure of Type 6,6 nylon delivers a more resilient and colorfast foundation for your carpet than Type 6 nylon.

What's more, Antron® Brilliance™ nylon is treated with DuraTech® soil resistant treatment, a one-time application that doesn't wash or walk off – delivering the long-term protection you want.

Benefits

- Delivers rich, vibrant color for unique beauty in commercial carpet designs, through patented fiber engineering
- Offers exceptional flexibility, with virtually unlimited styling options
- Withstands heavy soiling, for lasting good looks
- Resistant to stains, matting and crushing, thanks to Type 6,6 nylon polymer
- Provides an ecologically-friendly choice, as certified by the Environmentally Preferred Product (EPP) designation

What shape is your carpet in?

In addition to its high quality Type 6,6 nylon polymer, Antron® Brilliance™ nylon also offers a unique hollow fiber shape, which provides exceptional soil resistance and soil release. Its hollow filament cross section, exclusive to Antron® nylon, hides the appearance of soil, providing greatly improved long-term carpet appearance.

Go green

The good news is, you don't have to choose between carpet fiber performance and sustainability. With Antron® Brilliance™ nylon, you can have both.

Antron® carpet fiber is currently the first and only carpet fiber to receive the Environmentally Preferred Product (EPP) designation. Reviewed and certified by an independent third party, Scientific Certification Systems (SCS), EPP certification is an evaluation of a product's environmental impact and is a comprehensive measurement of sustainability.

Reach your peak performance

With the highest fiber performance standards for carpet durability in the industry, no one is harder on carpets than INVISTA. Before a carpet can be designated with the Antron® brand, it must pass a rigorous 14-point laboratory evaluation certifying that it meets the Antron® Brand Performance Standard.

Because carpet made of Antron® nylon is engineered to retain its like-new appearance for years under the harshest conditions, you can realize significant savings in maintenance and replacement costs over the lifetime of your carpet. With a low total cost of ownership among its many benefits, specify Antron® Brilliance™ nylon with confidence.

TECHNICAL SPECIFICATIONS	
Polymer	Type 6,6 nylon
Fiber Shape	Hollow Filament
Treatments	DuraTech® soil resistant treatment
Available Colors	Unlimited
Recycled Content	Available with Recycled Content
Recyclability	Nylon 6,6 fiber is recyclable
Warranties	Carpets of Antron® Brilliance™ nylon are backed by a 10-year abrasive wear and life-of-the-carpet static protection warranty.
